Student Life is now Student Involvement!

Over the summer, the office of Student Life switched its name to Student Involvement! Stop by and see us in the Student Involvement Center in 218 Havener, and check out our new updated website: https://involvement.mst.edu/

Check out what we've been up to over the summer, and what great volunteer opportunities are coming up this semester!

Boeing STEAM Education Camp
In June, 12 S&T students partnered with Boeing to help put on a STEAM education day camp in St. Louis! Volunteers helped lead groups of K-8th kids through various Science, Technology, Engineering, Arts, and Math activities throughout the day. Our volunteers had a great time getting kids excited about science, engineering, and art!

Join us the second Saturday of each month for 4 hour service projects in Phelps County. Register for one day or all 3! Register by the second Wednesday of the month. Open to S&T Students, Faculty, and Staff!

- Help with projects like scraping and painting a deck, gardening, and painting rooms in the museum
- Help with projects like clearing the creek banks and removing invasive plant species
- Help with projects at the Resale Shop such as tagging and distributing items, organizing the shop, and yard clean-up

Alternative Weekend Breaks give you an opportunity to immerse yourself in service for a weekend and learn about a social issue facing Missouri's communities. During this experience, we will travel as a group to Kansas City, get to know our team, do service on Saturday and Sunday morning, and reflect on the work we are doing and impact we are having on our state. For one of our service projects, we will be partnering with volunteers from Honeywell, which will give you the opportunity to network with employers as you work towards a common goal.
