We accept articles and stories, announcements for volunteer, civic engagement, and fundraising/philanthropy so that their volunteer schedule is flexible around their school schedule. Many community partners have regular volunteers that choose when they come. Second Saturday Service, MLK Day, Gonzo Gives Back, and several community opportunities in the area that are not a huge time commitment. Some of those include student’s overall confidence in their school work and life. There are many volunteer their time to those in need. This leads to increased confidence which can affect the be a healthy stress reliever. People often feel a sense of accomplishment after giving for a person’s mental, emotional, and physical health. Volunteering has been shown to more difficult classes than ever before. When stress builds up it can be very dangerous their own, balancing their own finances, cooking for themselves, and facing much.

College is an extremely stressful time for many young adults. It’s their first time on

EWB teams are working toward traveling during winter break this year. Water into the distribution to sustain the community. The Guatemala and Ecuador drilling a well in the community. A well will hopefully provide enough input of

HDPE with PVC. They also met with the government about the possibilities of implementation projects. In the community of Puerto Pando, S&T students were toward improving their lives in other ways. The Erquiz Oropeza (also known as: 10

the children, and it means time spent on collecting water and boiling it can go

supply. This has huge impacts on the health of the community members, especially

the community. This will help keep harmful bacteria out of their drinking water

Learn more about the program and individual trips at

Miner Challenge is Missouri S&T's Alternative Break Program. Every year, students engage in immersive volunteer experiences across the U.S. over Spring Break.

Alternative Weekend Breaks give you an opportunity to immerse

yourself in service for a weekend and learn about a social issue facing

your community. These service projects give you the opportunity to network with employers as you work towards a

common goal.

You will be partnering with volunteers from Honeywell, which will give

impact we are having on our state. For one of our service projects, we

will be partnering with volunteers from Honeywell, which will give

more experience. During this experience, we will travel as a

small group to another country and immerse ourselves in the culture.

This will give you the opportunity to network with employers as you work towards a

common goal.

To sign up for a trip, visit the Miner Challenge website at minerchallenge.mst.edu. The application deadline is September 20th.

Service Spotlight

Engines Without Borders

The Missouri S&T chapter of Engineers Without Borders (EWB) has been working on a project to build a water treatment system in Bandenj, a small village in Guatemala. The project includes the construction of a sedimentation tank and a slow sand filter, which will help provide clean drinking water to the community.

The team consists of 10 students who have been working on the project for several months. They have been conducting research, designing the system, and working on project management.

In September, the EWB team will travel to Guatemala to install the treatment system. The project is expected to be completed within the month.

The team is seeking additional volunteers to help with the installation. If you are interested, please contact the team at ewb.mst@gmail.com.
